DECEMBER 1986. #14 A\$1.00. J.C.E.D'ALTON. 39 Agnes St. TOOHONG. QLD. 4066.

AUSTRALIA.

Hi DOPs,

How many OOPs picked up the mistake in LE'VZ #13 where I was refering to my use of the Hodonga 2 metre Amateur repeater transmitting on 147000 MHZ. Boy what UHF., it should have been 147 MHZ.

It appears there are many OOPs who have not been 'stirred up' yet in regards to LE'VZ # 12. Perhaps YOU may like to write to me before our postage rates increase from 36c, again. I have developed a Demonstration/Advertisment Disc (DAD), which will be sent to various Dick Smith Stores, so please check with your DSE. store and see if it is being used.

I have given a brief report on the use of the VZ Modem Terminal Interface in this issue. There have been a few folk asking about it.

I have received an envelope with no letter or return address on it, so if you have not had a reply from me, it may have been yours. NO I can't read the postmark either.

By now you may have noticed the new print style, as I have invested in a new printer. A Citizen 120D. It has many print styles plus a new style of Double Height print. It will make LE'VZ look much better. Of course the print style has to be set before loading the DSE. Word Processor, but as I print LE'VZ in sections this will be no great problem. It is about time someone has had time to modify the M.P. programme to allow different print styles, but maybe soon.

I remind folk who send me contibutions to please make sure the print is nice and dark by fitting a new ribbon or handwriting with a RED pen.

Now some very good news for many folk/// I have negotiated with the Authors of AIRTRAFFIC CONTOLLER, LEARJET and some other software that was previously bought through DSE., to distribute/sell them via VSOFTWAREZ. Thanks to Brian Hanlon. See Software section.

I am also talking with the International Correspondence Schools management in regards to

LE'VZ 200/300 00P because their computer programming course includes a VZ in the package. So if you know of anyone who is doing the course would you please let them know about LE'VZ. and the Extended Basic unit.

With 1986 drawing to a close I would like to hold a little gathering again early December. Either at our place again, or if anyone else would like to offer their home which may have a larger room than where we held it last year, would be much appreciated. He had about 18 folk turn up last year. PLEASE contact me for further information as soon as you receive this LE'VZ.

There are a few OOPs who have received a list of OOPs in their area, so perhaps you can organise a gathering also. I can assure you that it is very rewarding.

Well that's all for this time. Marie and I wish you and your family have a very joyious Christmas season and may God be with you then and all through the New Year.

I am sorry but I may not be letting you know what is planned for the next LE'VZ or any future LE'VZ as it is very difficult planning so far in advance. I find that a more interesting article or programme should be printed, and so a planned item/s have to be held over until another LE'V2. Such as the articles on the Compumuse and ROM printer listings. I must not have more than five or six sheets of paper in LE'VZ otherwise the 36C postage is not enough.

Now that I can use Compressed print, I will be able to print more. Please let me know what you think of this LE'VZ.

** * WZ AND BULLETINBOARDS. * *

6050 INPUTTS: IFTS="Y"THEN10ELSEEND

Early one Saturday in September, Mr. Alex Young of Aspley was good enough to bring to our place his VI300, ETI/DSE VI-200 Terminal and a Sendata Modem V21 to demonstrate the operation of the VZ in relation to Bulletin Boards. I thank Alex again for the demonstration. Hr. Larry Taylor was also present.

The Sendata modem is a 300 Baud unit and was selling at the time for around \$190.00. To operate the system one has to learn a few switching actions but would not take long to remember. Once the system is set up, switch all on.

The VZ will display the System Menu.

Using the 'phone, dial the number required, listen and switch the modem as required. When the VZ system has acsessed the bulletin board's system, one enters information asked for which is pass code, log on name and so on.

As most bulletin boards run at 40 characters per line (across the VDU) the text is cut and wrapped around on the VZ VDU somewhat, but in general is quite readable.

A printer can be switched on/off but we found that a printer would NOT operate correctly. It also caused garbage to be viewed on the VDU. We are endeavoring to see what can be done to correct the situation. If anyone can help please let me know.

It is not possible to access VIATEL as it uses 1200/75 Baud rates.

The Disc System also would not operate. The ideal thing to be done is programme an EPROM so it would replace the one in the VZ interface unit.

This is a very brief outline of the units but I hope it throws some light on the subject. One would have to be prepared to spend a lot of time and 'phone bill money to get much benefit out of the system. There does not appear to be any VZ information on any bulletin board at present. If anyone knows where there is please let us know.

All prices are correct at time of printing, but may change without notice. All articles available while stocks last. All prices in As.

All tape software includes postage up to four tapes.

When ordering software, always state := which computer V2200 or V2300, if you have an expansion RAM unit, and if you have a disc drive system connected on denote as below.

VZ1 = unexpanded VZ200. VZ2 = unexpanded VZ300. VZ3 = expanded VZ200. VZ4 = expanded VZ300.

IE. TBIS = Tape only unit of BIS. DBS = Disc only unit of BS.

T/DE4 = Tape or Disc unit of E4. The price stated is for a Tape unit. If a sc unit is required, add \$5.00. to the Tape price. The price of a Disc unit is stated.

We now accept BANKCARD and VISACARD, as well as bank, building society, edit union, private cheques, or Aust Post money orders.

Make cheques payable to J.D'ALTON or VSOFTWARE7.

* * * NEW SOFTWARE, * * *

DE16 CHEQUE LEDGER DISC \$ 60.00. VZ3-VZ4.

A small business unit based on T/B1 (CASHBOOK LEDGER) but for Disc operation only, in that all data is saved/loaded to/from Disc.

Type in :- date, paid to, cheque *, bank * and 12 other * columns. View data, correct (edit) data, printout of all data across two A4 sheets of paper by printing the left side then the right side. This allows an 80 column printer such as a 6F100 or similar rather than an expensive wide business type.

Each "type in session" is saved to Disc, which is loaded in at the next session so that new data is typed in and merged. This is then saved to Disc. In this way the month's or period's file is built up ready to be printed at the close of the month/period.

At the close of that month/period, you type in the previous month's/period's running totals. All \$ totals are then calculated and printed at the bottom.

DU20. DISC BUARD. \$ 60.00. VZ1-VZ4.

DISK GUARD prevents easy copying of programmes stored on Disc. IE. (DCDPY) of FILECOPIER canNOT copy a DISKGUARDED Disc. Basic programmes are tomatically BREAKPROOFED to produce an autorum programme, which will re-rum if (BREAK) key is pressed. That programme CANNOT be effectively llisted/listed.

T/DU21 VZ-EPSON P/PATCH. \$15,00. VZ1-VZ4.

Larry Taylor's new M/L unit. It allows Epson or Epson compatible printers to RINT or LLIST all of the VZ's inverse and graphic characters. These same aracters can also be dumped to the printer from the LO-RES screen in the COPY de.ln MODE(1), use of the COPY command will also dump the HI-RES screen to the inter.

CDPY,n, allows a range of 4 to 8 to be selected to allow for varying line eds for different printers. The utility adjusts for any size VZ memory. It so prints the Extended Basic commands that are used if a programme is writtening the Extended Basic utility. Very handy! It can even be used with the tended Basic utility loaded.

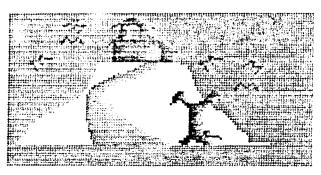

SPECIAL NOTE ON COPYPROTECT.

D/T19 COPYPROTECT will copy most but not all BASIC and M/L programmes. The SE. CHESS unit presents a problem because it starts in the communications region and not at the usual Bottom of Basic point.

400 LLIST

Larry Taylor's PRINTER PATCH unit T/DU21.

Refer to the software listing. The two pictures are a (COPY) of Scott Le Bruns game, Haunted Mansion. As you can see there is a difference between them. This is caused by the <COPYn> command on line 340. The Low Resolution (COPY) of lines 100 to 130 give one line spacing. In line 220 the <COPYn> command eliminates this line spacing to give the picture of one screen display of Larry's MORDMATCHING unit. By typing in the little programme after you have loaded PRINTERPATCH, you can test it with your Epson Compatable printer. Of course a Disc Drive System is required in this case to CBLDAD> the High Res. pictures.

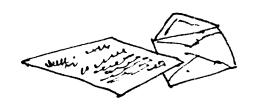

PRINTER PATCH will not work with a 6P100 printer. The High Res. screen can be printed by the <COPY> command, but the Low Res. picture will have the single line spaces present.

What do you call a drunken ghost?

A methylated spirit.

LETTERS TO THE EDITOR.

ar Editor,

This letter is in response to the "Stirring" you did in Le' VZ #12 about the tential of the VZ.

It has spurred me on to the stage where my VZ-300 is now permanently set up d with extra memory, printer interface, printer and joysticks. I am continuing upgrade my system.

rco Ostini, 8 Symes Street, Stanthorpe Q. 4380. VZ USER.

DISC FILE PROGRAMKING.

any folk have been asking how to change the "FILENAME" disc data SAVE, LOAD or ERAse. The only way it appears be achieved is by POKEIng the name into the part of latement for the disc system. In the case of reading or 4g to disc, there must be the OPEN statement.

400 OPEN"CLUBI", 1 for writing to disc.

address of the first character of the filename, in ase of C for CLUB, has to be calculated. the short programme below the first character of the se "FIRSTIZZ" on line 7 is 31591. That is the letter F ST. And so it goes for the other six statements on 8 to 20. The filename maximum length is eight so line in spaces to make a total of eight characters for the Line 4 allows for no more than eight characters to Ed.

thing from line 1 to line 20 can be changed otherwise dresses will change of the filename statements. It is you to arrange for data input and data read/print. is TA\$ in this programme. As mentioned in an earlier the maximum number of bytes in TA\$ is around 190. If ad more than that them a FOR-MEXT loop must be used, I would have to be changed to TA\$(X).

The are obviously other makes of doing the same job, hope this clarifies the matter with those who are sted. Dur LE'VZ D'BASE is quite different in this

BOB KITCH'S HARDWARE.

Bob has some hardware under wraps being developed in tar vein to David Newcombe. His first piece will be an slot mother/buffer board. Keep an ear open for more als. Watch Australian Electronics Monthly also. Bob is having articles printed in AEM, the first being about video display modifications to the VI in the October issue.

	256 by 192 Resolution Graphics Six (RG6)	5	6144	1 bit	1 X I

i), v) and ix) are implemented as standard on the V2's and x) may be easily implemented by a small hardware alteration detailed by Dimond in Aug. 84 'Electronics Australia' pg. 65.

From this brief description a grasp of how the VDG operates may be gleaned. However, a few other features exist on the chip and are readily accessable to the programmer.

A number of control lines may be soft switched to implement the various modes resident in the VDG. In the VZ a number of these lines are hard wired thereby rendering these options unavailable. (refer to hardware change referenced above)

Normal or Reverse Alphanumeric displays are set by the (INV) line. Selection of the internal(on chip) or external character sets held in ROM is set by the (INT/EXT) line.

Switching of the screen to Alphanumerics or Graphics mode is determined by the (A/G) line

Switching of the screen between Alphanumerics or Semigraphics mode is set by the (A/E) line.

Three lines (GMO, GM1, GM2) are used to select one-of-eight Graphics modes to be used.

An eighth control line (CSS) selects the colour set to be used in the particular mode selected. Most modes have two colour sets available in Alphanumeric and Semigraphics 4 modes one-of-two background colours is selected and in Semigraphics 6 and Full Graphics modes one-of-two colour sets is selected.

For completeness it is monitioned here that the VDG has access to the byte wide data buss(D7-D0) and the 13 least significant bits of the address buss(A12-A0) to enable up to 6K of video RAM to be handled.

The operating mode of A/S, INT/EXT, CSS and INV may be changed on a character by character basis.

I will discuss MODE(O) or lo-res graphics in the next LE'VZ

* LE'VZ labels *

As many ODPs are aware, the VZ prints the name and address labels of DOPs who have at least \$1.00 credit. If the credit is \$1.00, then a little reminder is also printed and included inside the envelope so that you may send more money if you wish to receive more LE'VZs.

Now I have programmed the VZ to print at the top of the label the \$ credit AFTER that LE'VZ. This will help 00°s keep tabs on their credit.

CUSTOMIZING YOUR DSE EAF MORD PROCESSOR for ANY VZ COMPUTER. by Bob Kitch 7 Eurella St., Kenmore QLD., 4069.

tape-based Epps and Fackerell Word Processor was for an expanded VZ-200 with top-of-memory (TOM) is at CFFFH. The program loads from 7880H to 957FH oh the top of the actual program is at 953DH. The area 7AE9H and 7B7FH is reserved as program stack space, ection of memory above 953DH is used to store the text Hey Presto! — from 953DH to TOM is 3AC2H or 15042. The latter number is readily identifiable as the of free bytes available when the program first fires

number of Users have expanded VZ-300 or VZ computers 64K memory packs such that TOM is above CFFFH. This is that the 15K character limitation should be capable ing exceeded by getting into the original code, unately Messrs. E&F did not program the MP to be enough to look at the TOM pointers located in the ed RAM area at 78B1/2H as this would then have made illocation of free space automatic for any memory size ding 957FH). Note that an unexpanded VZ-200 (8K) has icient memory to load the MF program.

e following expose details the alterations to the code ed to make the MP "smart". It requires the use of a MONITOR/EDITOR program. I would recommend Mr. N. et's MONITOR-DEBUGGER V2.0 (an indispensable utility the serious User and available from Mr. N. O'Brist, 50 Av., West Ryde, N.S.W. 2114 for \$20 on tape and with ction sheet) — but any other monitor would do.

e method of altering the program involves "patching" ode over existing code located in the initialization me so that the program flow is directed into a new of code placed in previously unused space. The new poks at the TOM pointers and then sets about altering her of constants embedded in the code itself. This is apple of self-modifying code done during program ion time. After the necessary alterations, flow is sed to the initialization routine. The patch code is mently over-written by text, but it has done its job en. Sounds horrendous doesn't it? Practically the ure is simple. The Assembler code is given below for sterested reader to follow.

etching with a MONITOR is a very powerful technique for ying programs to do what you want them to do. The i program is finally loaded to tape/disk for ling, verification and use, although in this instance I tone this for you.

llow closely :-

. Load the MP program using your MONITOR. . Use the Display and modify command to insert the hex. .nto the indicated memory locations as follows. MODRESS HEX ASSEMBLEA.

9475 CD 3E 95 CALL 953E ; Go to self-modifying routine.

3. Check the hex listing and them save the "SMART.WP" on tape or disk and test.

If you have an expanded VZ-200 or 300 with a 64% expansion (TOM at FFFFH and 34K) then the number of free characters is 27330. The TOM can actually be set to any value before loading the MP which will then adjust itself to the set amount of available memory.

An unexpanded VZ-300 (16K) will have 8898 characters free; an expanded VZ-200 (24K) has 15042 and an expanded VZ-300 (32K) has 25282.

I hope that you manage to get the MP working in the manner described. It certainly makes it more useful. If anyone has any problems please let me know.

* CHRISTMAS GATHERING *

I will arrange another gathering this year similar to last years one, /3 th. of DECEMBER 1986 at the MILTON PRIMARY SCHOOL, BAYSMATER RD, MILTON. Start about 9AM to about 4PM. We will be demonstrating all sorts of software and hardware. I will have various items for SALE at 10% off. A lucky door prize also. Bring your own drinks and eats, although there are shops about 200 metres away. Bring your favourite piece of software or hardware. PLEASE contact me as soon as you receive this LE'VI, IF YOU INTEND TO BE PRESENT. J.D.

The second public domain disc directory is on page 9 .

"Are you married?"

- "Yes."
- "Children.?"
- "Three boys and two girls". "That's five altogether."

"No-- one at a time."

PUBLIC DOMAIN SOFTWARE.

i am now able to offer some Public Domain Software on disc. Below are two disc directory printouts.

At present I haven't got the time to save them to tape as it is a rather time consuming process. The cost is A\$15.00. We supply the disc and postage anywhere in Australia.

special Demonstration-Advertisment-Disc
- It will hopefully help DSE sell more VZs and Disc writs. It will hopefully help us (VSOFTWAREZ) to sell our excellent software. Finaly and most importantly help existing and future V2 owners to obtain more nefits from their VZ.

text is brief and to the point. The High Res will attract peoples attention. It will run rly. There are four time delay selects. The time selected will enable the demo to run for about s and the longest about 4 hours.

ave sent the DAD to a DSE store in each capital have asked them to copy it and distribute copies to er stores. Also if any of their custome a ask for a is up to the store's management to decide how to i, but I suggest you supply a blank (Ihiled) disc micely, they may (DCOPY) it for you. Otherwise send O for a copy, which will include the disc and

ESS THAT COPS ASK YOUR DSE. STORE STAFF TO HAVE THE ING AND ON A COLOUR MONITOR IN PARTICULAR!!! "HAHKS- J.D.

HAS THE VZ COME OF AGE???

Yes it has. The WAWZ Club of Perth has a job for the VZ the 9th. and 10th. of January 1987. There will be an ralian Speedway Championship meeting at the Claremont dway involving the VZ against AMY computer for the first we to calculate the progressive points system.

To read more about it, see the "Mational Speedway "strated" October 1986 magazine by the "Wewlyn Publishing p of MSM". The magazine is distributed through-out malia, New Zealand and the United States. So mark one up the GREAT VZ.

THE MATERIAL IS FOR PRIVATE USE OF READERS ONLY.

-IGHT IS RETAINED BY THE AUTHOR.

Graeme Bywater, here in the west along with other are interested in starting up a National or stional VZ users group. The idea is to exchange ideas, worts and such-like to help all concerned. Also any sing to everybodys mutual benefit could be catered one can go direct from club (group) to club or through 200/300 DOFs magazine. The cost (subject from time to s John D'Alton declares) is a \$1.00 (AUD). The cost of 00 coin is to suppliment the cost of the extra space d in the magazine and in turn to keep the cost of a od magazine down for some time to come.

terested groups can write to me at 53 Kensington Ave., . NA. 6062 or P.O. Box 388. The alternative is to to the LE'VZ 00P magazine. Please put pen, pencil or or to paper.

When she angels went away from Thom back into Reaven, the shependo said Ao one another, "Let's go so Bethlehem and usee Ales Attener Atted has happened which she hord has stold To they hunied and Joseph, and saw the baby lying in We manger.

LUKE 2:15-16

CELESTRON SOFTHARE.

Hr. D Dower of Ringmood VIC. received a tape programme in early October from Celestron. He ordered it in June 1986 so communicated with the Minister for Consumer Afrairs because of the delay.

*** BOB KITCH'S INFO ***

Bob has now much more information and so has printed an eight page booklet. It includes :-

Vz Books.

Books on BASIC.

Books on ASSEMBLER and Z80.

Connercial software reviews.

He also has compiled a list of past and present software advertisers.

Write direct to:-

Mr. B Kitch, 7 Eurella St., KENHORE. QLD 4069.

Or 'phone (07)378 3745. Always include a S.A.S. Envelope for any replies.

BUG IN SPRITE GENERATOR.

Scott Le Brun of Belgrave Heights has found this error in the instruction manual. On page 13 - (POKEs for Image Humber)

POKE 32320,xxx should be - POKE 32230,xxx

"How are you getting on with your football, Peter?"

"Well, pretty Dad. The good. sports master said I was one of the team's greatest drawbacks."

LEIVZ #14 P 12.
